

program funds for eligible persons seeking abortions.

Several provisions in H.R. 2403 condition the President's authority—and the authority of certain agency officials—to use funds appropriated by this Act on the approval of congressional committees. The Administration will interpret such provisions to require notification only, since any other interpretation of such provisos would contradict the Supreme Court ruling in *INS vs. Chadha*.

The Act contains a prohibition on the implementation of the NPR recommendation to transfer the functions of the Bureau of Alcohol, Tobacco and Firearms to the Department of Justice. Because this prohibition is representative of the kind of restriction cited by the NPR as counterproductive to efficient government operations, I will work with the Congress to lift it.

### **Statement on Signing the Energy and Water Development Appropriations Act, 1994**

*October 28, 1993*

Today I have signed into law H.R. 2445, the "Energy and Water Development Appropriations Act, 1994."

This Act provides funding for the Department of Energy. In addition it provides funds for the water resources development activities of the Army Corps of Engineers and the Department of the Interior's Bureau of Reclamation. Various related independent agencies are also funded by this Act.

This Act supports a number of my high-priority investment proposals in the Department of Energy. These include cooperative research and development agreements, solar and renewable energy programs, and the Stanford Linear Accelerator Center B-Factor. The bill also supports my investment

proposals for improved maintenance at Army Corps of Engineers facilities.

I am disappointed that the Congress has not provided funding in this Act for continuing construction of the Superconducting Super Collider (SSC). This project was an important element of our Nation's science program, and its termination is a serious loss for the field of high energy physics. I am glad, however, that the bill does redirect the SSC funds to be spent for orderly termination so that we can assist the affected workers and communities in Texas and elsewhere. I look forward to receiving a report from Secretary of Energy, Hazel O'Leary, on future options for the Nation's high energy physics program, now that the planned centerpiece for the field has been terminated.

I am also disappointed that, with the limited resources available, the Congress has added funds for unrequested water projects and studies. In total, this Act provides over \$300 million more than I requested for such projects and studies within the Army Corps of Engineers and the Bureau of Reclamation.

I am pleased that this Act provides funding for the Dual-Axis Radiographic Hydrotest facility (DARHT). In the absence of underground nuclear weapons tests, the DARHT facility will be vital to maintaining confidence in the stockpile.
